To Whom It May Concern:

  Since February of 2012, I have been working as a Web Designer and Developer at Code Red Safety. While in this position, I have gained experience in all aspects of web concept, design, and development. I have developed multiple sites using Responsive Web Design Concepts. During my time, there was opportunity to gain many important skills such as managing time constraints and spontaneous change within projects. While speaking with two different departments I noticed a communication conflict and saw room for improvement. I took it upon myself to develop an online mobile form for the Sales Team to streamline communication with the Scheduling Department while in the field. I hosted and led training classes to non-technical individuals and it has become a huge success.

I graduated from Purdue University in 2011 receiving a Bachelor's of Science in Computer Graphics Technology. As a student who went through the curriculum, I gained the knowledge and skills necessary to become an asset to your company. Having achieved the goal of completing my education and starting my career, I am interested in expanding my professional horizons and personal goals by seeking new challenges. I have enclosed my resume for your review.
Please contact me at (219) 776-2055 or by e-mail at kmorales076@gmail.com.
I look forward to hearing from you. Thank you for your time and consideration.

Sincerely,
Kevin Morales
